Low prices to maximize volume

Wide field of optimum size to utilize efficient production on date led

Cooking liner

NoStik® cooking liners are reusable non-stick frying and baking sheets with a Teflon® surface on both sides. They exceed the qualities of baking paper combined with the advantages of Teflon®. The non-stick Teflon® coating allows you to fry and bake without adding any fat. Nothing sticks to the liners; fry pan and baking tin/tray stay clean.

- gives any pan or tray a 100% non-stick surface
 - durable and therefore reusable
 - no more oils or fats for cooking - promoting healthier eating
 - can easily be cut to size and shapes to fit all tins, trays and fry pans
 - ideal to serve delicate dishes (fish, egg sunny side-up, ...)
 - versatility of use (suitable for all cookers/ovens/microwaves/grills)
 - heat-resistant up to 260°C (500°F)
 - gives pans, baking trays and tins a longer life
 - cookers, oven, pans and trays stay clean
 - simple to clean
 - dishwasher safe
- **Lining fry pan:** for baking eggs, fry meat, fish,...
 - **Lining roasting tin, grill plate, party grill:** to prepare meat, fish, poultry, chips,...
 - **Lining bottom/sides baking tins:** for baking pie, biscuits, fruitcakes, lasagna, ...
 - **Lining baking tray:** for baking meringues, flapjacks, pizza, bread...
 - **As non-stick working mat:** for pastry making, sugarpaste, marzipan, chocolate work, ...
 - **Lining microwave turntable/bottom:** for protecting microwave against splashes.
 - Cover up foil in microwave to avoid splashes.
 - **Oven lining:** to protect the bottom of the oven against splashes

The NoStik® cooking liners have been tested (in accordance with the European standard 45001) by TNO (Belgium) and have been found to be 100% safe for contact with foodstuffs at high temperatures according to international standards.

2 qualities: heavy duty fry pan liners (0.13 mm) and oven & bakeware liners (0.08 mm)

Teflon® is a registered Trademark of E.I. DuPont de Nemours & Co.

no buttering or flouring
